SUPPORTING DIFFERENT ABILITIES IN THE CLASSROOM

A PROVIDER CONNECTION WORKSHOP

This 2-Hour Workshop is for educators supporting children living with differing abilities in their classrooms.

This workshop will be geared towards supporting emerging learners living with Autism Spectrum Disorder (ASD) in the classroom.

You will learn more about ASD, how it can present, and what evidence-based strategies for supporting these children in the classroom.

About the Provider Connection

As part of PACCC's mission and values to support the professional growth of early childhood professionals in our local community, The Provider Connection offers workshops from September through June each year. We offer CPR several times throughout the year and a health and safety class once per year. In addition to a variety of professional development topics, we offer workshops on wellness to encourage self-care and well-being for parents and professionals who care for children.
